# xArray

2D steered-beam  
PoE RFID reader

150 m<sup>2</sup> floor coverage  
at 4.5m height

Better than 1.5m  
spatial resolution

Unaffected by 1000's  
of stray tags

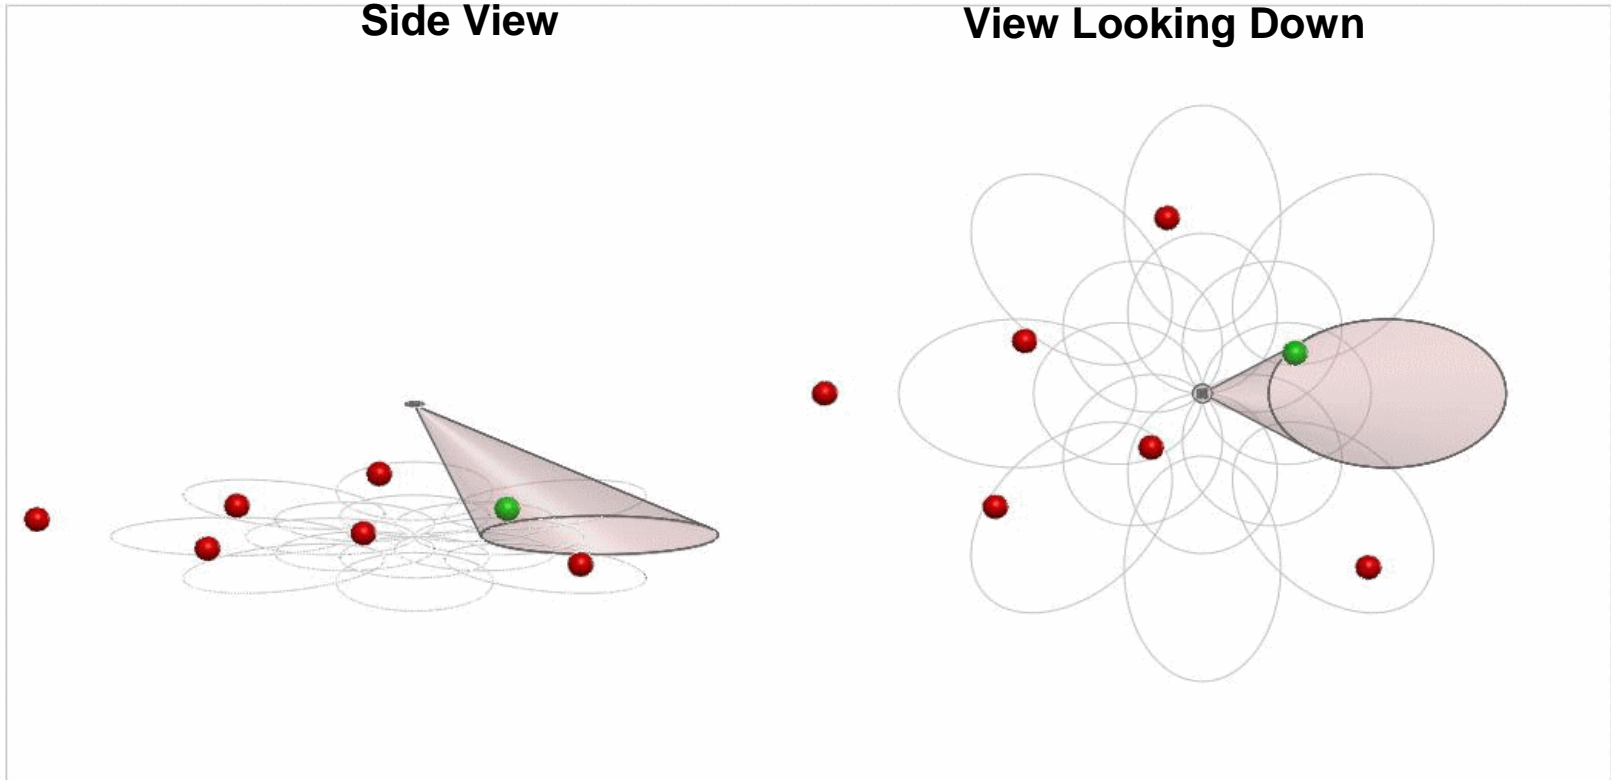

Beacon, tilt sensor  
VESA mount

# xArray Synthesizes 52 Dual-Linear Beams

**Dual-linear, radiates in horizontal and vertical plane for each beam**

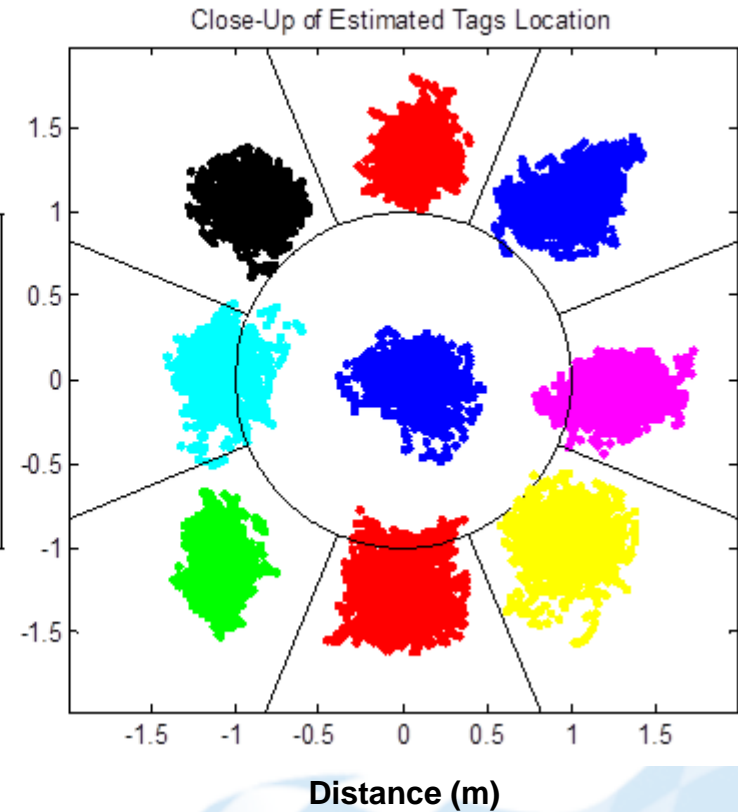

# xArray Generates a Unique Read Field

Colored circles represent tags/reads

# Tag Locating Using xArray

- Longer integration time = better accuracy

# xArray at National Retail Federation (NRF)

- 3 xArrays mounted overhead in Intel booth
- Intel guides & guests carried Monza 4 ID cards
- xArrays generated traffic heat map of the booth

# xArray Performance Demonstration

- xArray mounted at 3.2m height
- Tags occupy  $12.2 \times 13.5$  m floor space
- Each  $30.5 \times 30.5$  cm square has 2 tags
- 3264 tags; square turns green when inventoried
- Video is real-time

xArray WAH Mapper
